HOW DOES THE APPLICATION PROCESS WORK?

Interested families can apply during an open Choice and Magnet Application Window. The application is done by a lottery system.

Once offers are made available, families will then be notified via email and phone of the results. You will then have a window of time during which you may respond online to accept any offer you may have received.

It does not matter when your application is submitted. There is no first come, first served process for applications.

During an application window, families can apply to up to three elementary magnet schools and five middle magnet schools. Magnet Schools and non-Magnet school options are NOT ranked on the application—you can receive an offer to any school (or no school) listed on your application.

If you are only interested in one specific school, list only that school and no alternatives since there is a chance only one offer may be given.

Additional weighting is provided to the applications of siblings on the elementary and middle school levels only when one sibling is currently enrolled for the school year. This additional weight is not a guarantee.
