Program:
Welding

Current Employer:
KTA-Tator Inc.

How was Erwin different from other schools?

My instructor, Ray Laferriere, is the best instructor to ever walk this rock we call Earth. He was realistic, unbiased and straight forward. Not to mention, he's an excellent welder. Erwin is what made that course available, but Ray is what made that course exceptional.

What are your career accomplishments?

Fracture critical Bridge welder, helping make the Margaret McDermott bridge in Dallas, Texas. Certified welding inspector. Thankful individual.

What is one thing that future students should know about Erwin?

Erwin offers great courses instructed by great instructors. Attending class alone will not guarantee your success though. Don't wait for life to open a door for you when you have two capable hands. Choose your doorknob, step forward and open it.
